3

ANSWERING SERVICE

When calling after hours select option "2"

Business Hours:

M-Th 830AM-430PM
Fri 830AM-2PM

Dr George Meers

Tacoma resident & optometrist with over 20 years experience.

Dr. Meers provides non-surgical treatment for eye diseases. He prescribes topical medications, eyeglasses & contact lenses.

Sound to Narrows

Before opening for business, Tacoma Eye sponsored an informational booth for runners and spectators at the 2018 Sound to Narrows road race held at Vassault park in Tacoma.

“Building and belonging to a community is one of the core values at Tacoma Eye” says Dr. George Meers, an optometrist and the owner of Tacoma Eye. “As a doctor I want to help people and I want to provide patients the highest level of service and products possible no matter where I work”. But, he says “Now I am providing care to my neighbors which is exciting.” Dr Meers has lived in Tacoma for more than a decade. “My family loves Tacoma and there is no place quite like it”. Dr Meers should know - He has lectured and cared for patients in a number of academic clinics and hospitals across the country including Boston, Denver, Miami, San Diego and Seattle - He was even a member of the faculty at the University of Auckland in New Zealand. After living in Tacoma and commuting to the Seattle veteran’s affairs hospital for many years he decided to open a practice close to home. “I saw my commute go from 90 minutes to 120 minutes to over two hours. One way. My children were small and I was spending more time in my car than with my kids so something had to change. I loved taking care of the veterans but I had to do what was best for my family.” With the veteran’s choice act Dr Meers can still see veteran patients. “A few patients have kept tabs on me and new legislation allows veterans to avoid long waits and receive exams from private eye doctors”.

The informational booth at the sound to narrows featured literature on UV light, Sun Damage and protecting your eyes for the sun’s rays. As a give away **Tacoma Eye** held a raffle the winner received a pair of polarized sunglasses. Julie Milasich of Tacoma, WA was the recipient. Look out for the **Tacoma Eye** booth in 2019!

Tacoma Eye carries a number of popular sunglass brands including Ray Ban, Oakley, Coach and more!

Vision Plans & Medical Insurance

Tacoma Eye is a Full Service optometry provider. We take care of your eyeglass, contact lens and we treat eye diseases without surgery.

Vision Plans cover periodic eye examinations and refractions (when the optometrist determines the eyeglass prescription). Some vision plans will contribute some money towards eyeglass materials or contact lenses. (Usually not both). Vision insurance does not cover specialized testing like visual fields or dry eye treatments.

Medical insurance covers medical eye care services such as eye emergencies and diseases, and evaluation and management visits of diseases or suspected diseases. Often, diagnostic tests (like a visual field evaluation) are covered under medical insurance.

It is important for our office to have BOTH vision plan and medical insurance information to minimize your out of pocket expenses.
